

COMPACT WATER HEATERS

SmartTap is a brand-new series among Electrolux water heaters. These compact models heat the water immediately. You can install them instead of standard faucets or any other horizontal surfaces. It is very comfortable tap because of flexible faucet and heating indication. Of course, it is still very safe due to overheating sensors.

SmartTap

Easy installation

SmartTap series are installed instead of usual faucets or on any solid horizontal surface instead of a standard faucet, and the installation does not require much time and effort. In addition, to connect the power supply you just need to plug your heater in.

Flexible Faucet

SmartTap series is supplied with flexible faucet which is very convenient in everyday usage - you can adjust it as you prefer.

Technical characteristics

Characteristic/Model	SmartTap
Rated Voltage, V	220
Type of Heating Element	Stainless steel heating tube
Half/ Full Power, W	3000
Rated Frequency, Hz	50
Water flow (L/ MIN) for Δt 29°C	1.3
Accuracy of heating to the established temperature	$\pm 10^\circ\text{C}$
The resistivity of the water Omega cm Ω	$\geq 800 \Omega$ 15°C
Ingress protection class	IPX4
